

Our Commitment to Pipeline Safety

Cogent Midstream is committed to the safe and reliable operation of its pipelines in the communities in which we operate.

Our pipelines are designed, installed, tested, operated and maintained in accordance with all applicable federal and state requirements.

Public outreach education is performed routinely with excavating contractors, emergency response officials, and the affected public.

In the unlikely event you suspect or experience a pipeline emergency, you can reach us 24 hours a day, every day of the year at
1-866-688-9685

Dig Safe

Call 811 at least 48 hours before starting your project to have all lines running beneath the property identified and marked. Do not begin the project until the lines have been clearly marked.
